

Nolco-Soft

Packaging material for flexible, form-fitting surface protection

Nolco-Soft is a composite made of polyethylene foam and crepe paper. As a particularly lightweight, tear-resistant, flexible, and cushioning packaging material, it is ideal for protecting all sort of goods and surfaces. Nolco-Soft is available in rolls of 50 m in length and widths from 100 to 1,500 mm. Once wrapped around the goods to be packaged, Nolco-Soft adapts to a form-fitting, protective padding and can be easily fastened or sealed with tape, strapping or stretch film due to its light weight. Nolco-Soft can replace costly outer packaging.

Advantages

- “ thick enough to form a safe cushion protection when wrapping
- “ can be easily cut with a knife
- “ simple fastening, for example, with adhesive tape
- “ small storage space requirements
- “ simple processing
- “ low material consumption

Delivery forms

- “ standard width: 1,500 mm
- “ customized widths: 100, 150, 250, 300, 500 and 750 mm
- “ outside: crepe paper
- “ inside: polyethylene foam, 6 mm thick
- “ standard length: 50 m per roll

Application

- “ suitable for sensitive surfaces; galvanized or polished goods are also securely embedded
- “ form-fitted packaging for products with uneven surfaces

Technical specification

- “ material weight approximately 600 g/m²
- “ outside: crepe paper
- “ inside: polyethylene foam, 6 mm thick, 35 kg/m² volume weight
- “ color: brown/transparent
- “ odour: neutral
- “ storage: -10 to 60 °C
- “ humidity: no influence when stored under roof
- “ necessary precautions: none
- “ not a health hazard, no hazard from contact with skin or inhalation
- “ disposal by landfill, composting or incineration
